Compliments of Sandhu Dental Group

Greetings from your  
Neighbourhood Dentist!

Dear Neighbour:

I am writing this letter to inform you that I will be relocating my practice to a new location in Kemptville. My new practice will be located in the Kemptville Mall, Hwy 43. This transition will take place in February 2009.

It gives me great pleasure to announce that my brother Dr. Gurfateh Sandhu will be joining me in partnership. We have made the decision to rename the dental practice **Dentistry@Kemptville**. You will recognize some familiar faces of existing staff as well as meet new team members.

Our goal is to continue to provide you with the best dental care possible to improve or maintain your oral health. We will continue to offer the same services as well as provide you with laser dentistry and digital radiography. I will also provide oral sedation dentistry, this will allow anxious patients to feel comfortable throughout the entire dental procedure.

The office will be open evenings and Saturdays to help accommodate your schedule. If you have any questions or concerns please feel free to contact us at 613.258.5200. I look forward to seeing you in the new location, and continuing to be your dental care provider.

Sincere Regards,  
Dr. Raja Sandhu

## Our Services Include:

# Wake Up To A Beautiful New Smile!

If you're one of the millions of people who have been avoiding regular dental visits due to extreme anxiety about an anticipated dental procedure, we have some great news for you. Our office is offering **oral sedation**. Even though you are not technically asleep during your dental visit, patients describe the experience as seeming to be asleep, which means that they don't feel or remember the dental procedures, and also have no recollection of the sounds or smells of the dental office, both of which are top triggers for dental fear.

Imagine this ... your dentist advises you that you need a filling, crown, root canal or other surgery. You're feeling apprehensive, so, after a careful medical screening procedure to ensure that you are a good candidate for **oral sedation**. The beauty of **oral sedation** anesthesia

is it allows you to be in a comfortable sleep-like state throughout your dental procedure.

**Oral sedation** is ideal for patients who are fearful of the dentist or who experience dental anxiety, and also for special needs patients who may have trouble sitting still for an extended period of time. It is a good option for people who may need to have a number of dental procedures done, who simply can't keep coming back for multiple appointments and so just want to have all the work done at once. The sedation works for two to eight hours, depending on the amount of dental work you need.

We encourage you to ask us about **oral sedation** and how it can help take the anxiety out of your next dental visit

## LASER DENTISTRY

We are thrilled to introduce the convenience of Laser Dentistry to our practice. Waterlase® dentistry is an energy combined with water, used to perform a wide range of dental procedures. Depending on the individual and the treatment required, **it is possible for patients to have less and sometimes no dental freezing.**

This is available for adults and children. If you should have any questions or want more information in regards to the Waterlase®, please feel free to contact our office at **613-258-5200**.

## PREVENTIVE DENTISTRY

We believe in identifying and addressing dental concerns at the earliest stage possible. Our recommendation is to bring your child for their first visit to the dentist once their first primary tooth has erupted.

We love to interact with children, and want their first visit to the dentist to be an exciting time for them. They will enjoy a ride in the dental chair, watch their favourite movie while we count their teeth but most importantly visit the big treasure box!
